

Instructions for COLING 2025 Proceedings

Anonymous COLING 2025 submission

001	Abstract	<code>\usepackage[review]{coling}</code>	035
002	This document is a supplement to the general instructions for COLING 2025 authors. It contains instructions for using the \LaTeX style files for COLING 2025. The document itself conforms to its own specifications, and is therefore an example of what your manuscript should look like. These instructions should be used both for papers submitted for review and for final versions of accepted papers.	For the final version, omit the review option:	036
003		<code>\usepackage{coling}</code>	037
004		To use Times Roman, put the following in the preamble:	038
005		<code>\usepackage{times}</code>	039
006		(Alternatives like <code>txfonts</code> or <code>newtx</code> are also acceptable.)	041
007		Please see the \LaTeX source of this document for comments on other packages that may be useful.	042
008	These instructions are for authors submitting papers to the COLING 2025 conference using \LaTeX . They are not self-contained. All authors must follow the general instructions for COLING 2025 proceedings which are an adaptation of (or rely on) the general instructions for ACL proceedings ¹ , and this document contains additional instructions for the \LaTeX style files.	Set the title and author using <code>\title</code> and <code>\author</code> . Within the author list, format multiple authors using <code>\and</code> and <code>\And</code> and <code>\AND</code> ; please see the \LaTeX source for examples.	043
009		By default, the box containing the title and author names is set to the minimum of 5 cm. If you need more space, include the following in the preamble:	044
010		<code>\setlength\titlebox{<dim>}</code>	045
011		where <code><dim></code> is replaced with a length. Do not set this length smaller than 5 cm.	046
012	1 Introduction	4 Document Body	056
013	The templates include the \LaTeX source of this document (<code>coling_latex.tex</code>), the \LaTeX style file used to format it (<code>coling.sty</code>), a COLING bibliography style (<code>coling_natbib.bst</code>), an example bibliography (<code>custom.bib</code>), and the bibliography for the ACL Anthology (<code>anthology.bib</code>).	4.1 Footnotes	057
014		Footnotes are inserted with the <code>\footnote</code> command. ²	058
015	To produce a PDF file, $\pdf\LaTeX$ is strongly recommended (over original \LaTeX plus <code>dvips+ps2pdf</code> or <code>dvipdf</code>). $\Xe\LaTeX$ also produces PDF files, and is especially suitable for text in non-Latin scripts.	4.2 Tables and figures	060
016		See Table 1 for an example of a table and its caption. Do not override the default caption sizes.	061
017	2 Engines	As much as possible, fonts in figures should conform to the document fonts. See Figure 1 for an example of a figure and its caption.	062
018		Using the <code>graphicx</code> package <code>graphics</code> files can be included within figure environment at	063
019	3 Preamble		064
020			065
021	The first line of the file must be		066
022	<code>\documentclass[11pt]{article}</code>		067
023	To load the style file in the review version:		
024	<hr/> ¹ http://acl-org.github.io/ACLPUb/formatting.html	<hr/> ² This is a footnote.	

Command	Output	Command	Output
<code>{\"a}</code>	ä	<code>{\c c}</code>	ç
<code>{^e}</code>	ê	<code>{\u g}</code>	ğ
<code>{`i}</code>	ì	<code>{\l}</code>	ł
<code>{.I}</code>	İ	<code>{\~n}</code>	ñ
<code>{\o}</code>	ø	<code>{\H o}</code>	ö
<code>{'u}</code>	ú	<code>{\v r}</code>	ř
<code>{\aa}</code>	å	<code>{\ss}</code>	ß

Table 1: Example commands for accented characters, to be used in, e.g., BibT_EX entries.

Figure 1: A figure with a caption that runs for more than one line. Example image is usually available through the mwe package without even mentioning it in the preamble.

an appropriate point within the text. The `graphicx` package supports various optional arguments to control the appearance of the figure. You must include it explicitly in the L^AT_EX preamble (after the `\documentclass` declaration and before `\begin{document}`) using `\usepackage{graphicx}`.

4.3 Hyperlinks

Users of older versions of L^AT_EX may encounter the following error during compilation:

```
\pdfendlink ended up in different nesting level than \pdfstartlink.
```

This happens when pdfL^AT_EX is used and a citation splits across a page boundary. The best way to fix this is to upgrade L^AT_EX to 2018-12-01 or later.

4.4 Citations

Table 2 shows the syntax supported by the style files. We encourage you to use the natbib styles. You can use the command `\citet` (cite in text) to get “author (year)” citations, like this citation to a paper by Gusfield (1997). You can use the command `\citep` (cite in parentheses) to get “(author, year)” citations (Gusfield, 1997). You can use

the command `\citealp` (alternative cite without parentheses) to get “author, year” citations, which is useful for using citations within parentheses (e.g. Gusfield, 1997).

A possessive citation can be made with the command `\citepos`. This is not a standard natbib command, so it is generally not compatible with other style files.

4.5 References

The L^AT_EX and BibT_EX style files provided roughly follow the American Psychological Association format. If your own bib file is named `custom.bib`, then placing the following before any appendices in your L^AT_EX file will generate the references section for you:

```
\bibliography{custom}
```

You can obtain the complete ACL Anthology as a BibT_EX file from <https://aclweb.org/anthology/anthology.bib.gz>. To include both the Anthology and your own .bib file, use the following instead of the above.

```
\bibliography{anthology,custom}
```

Please see Section 5 for information on preparing BibT_EX files.

4.6 Equations

An example equation is shown below:

$$A = \pi r^2 \tag{1}$$

Labels for equation numbers, sections, subsections, figures and tables are all defined with the `\label{label}` command and cross references to them are made with the `\ref{label}` command.

This an example cross-reference to Equation 1.

4.7 Appendices

Use `\appendix` before any appendix section to switch the section numbering over to letters. See Appendix A for an example.

5 BibT_EX Files

Unicode cannot be used in BibT_EX entries, and some ways of typing special characters can disrupt BibT_EX’s alphabetization. The recommended way of typing special characters is shown in Table 1.

Please ensure that BibT_EX records contain DOIs or URLs when possible, and for all the ACL materials that you reference. Use the `doi` field for

Figure 2: A minimal working example to demonstrate how to place two images side-by-side.

Output	natbib command	ACL only command
(Gusfield, 1997)	<code>\citep</code>	
Gusfield, 1997	<code>\citealp</code>	
Gusfield (1997)	<code>\citet</code>	
(1997)	<code>\citeyearpar</code>	
Gusfield’s (1997)		<code>\citeposs</code>

Table 2: Citation commands supported by the style file. The style is based on the natbib package and supports all natbib citation commands. It also supports commands defined in previous ACL style files for compatibility.

DOIs and the `url` field for URLs. If a Bib_TE_X entry has a URL or DOI field, the paper title in the references section will appear as a hyperlink to the paper, using the `hyperref` L^AT_EX package.

Acknowledgments

This document has been adapted by Emily Allaway from the instructions for earlier ACL and NAACL proceedings, including those for NAACL 2024 by Steven Bethard, Ryan Cotterell and Rui Yan, ACL 2019 by Douwe Kiela and Ivan Vulić, NAACL 2019 by Stephanie Lukin and Alla Roskovskaya, ACL 2018 by Shay Cohen, Kevin Gimpel, and Wei Lu, NAACL 2018 by Margaret Mitchell and Stephanie Lukin, Bib_TE_X suggestions for (NA)ACL 2017/2018 from Jason Eisner, ACL 2017 by Dan Gildea and Min-Yen Kan, NAACL 2017 by Margaret Mitchell, ACL 2012 by Maggie Li and Michael White, ACL 2010 by Jing-Shin Chang and Philipp Koehn, ACL 2008 by Johanna D. Moore, Simone Teufel, James Allan, and Sadaoki Furui, ACL 2005 by Hwee Tou Ng and Kemal Oflazer, ACL 2002 by Eugene Charniak and Dekang Lin, and earlier ACL and EACL formats written by several people, including John Chen, Henry S. Thompson and Donald Walker. Additional elements were taken from the formatting

instructions of the *International Joint Conference on Artificial Intelligence* and the *Conference on Computer Vision and Pattern Recognition*.
